

AKSHAT KUMAR JHA

Ranchi, Jharkhand

☎ [+91-7856828375](tel:+91-7856828375) ✉ akshatiiit@gmail.com  [LinkedIn](#)  [GitHub](#)  [LeetCode](#)  [GeeksforGeeks](#)

Summary

Full-stack Software Engineer with strong foundations in DSA, OOP, and MERN stack development. Experienced in building AI-integrated platforms, RESTful APIs, and scalable real-time systems. Proficient in Next.js, Node.js, MongoDB, and Socket.io with production deployments on Vercel and Render.

Education

Indian Institute of Information Technology, Kalyani

Aug 2023 – Jun 2027

B.Tech in Electronics and Communication Engineering – CGPA: 9.40/10

Kalyani, West Bengal

– **Relevant Coursework:** Data Structures & Algorithms, OOP, Machine Learning, Computer Networks, DBMS, Operating Systems

Technical Skills

Programming Languages: JavaScript, C, C++, Java, Python, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, shadcn/ui, React Leaflet

Web Technologies: REST APIs, WebSockets, JWT Authentication, SSR, Event-Driven Architecture, Atomic Operations

Databases: MongoDB, MongoDB Atlas, Mongoose ODM, Geospatial Indexing, Database Modeling

AI & APIs: Google Gemini API, Clerk Authentication, OSRM Routing, OpenStreetMap, Inngest

Developer Tools: Git, GitHub, Vercel, Render, Postman, VS Code, IntelliJ IDEA, CI/CD Pipelines

Projects

AI Finance Platform | *Next.js, TypeScript, MongoDB, Clerk, Inngest, Gemini API, Vercel*  [GitHub](#) | [Live](#)

- Architected a scalable full-stack finance platform with **multi-account management**, real-time expense tracking, and **interactive analytics dashboards** powered by MongoDB aggregation pipelines.
- Built secure **RESTful APIs** with **Clerk authentication**, atomic balance updates, and advanced filtering; integrated **Gemini API** for AI-powered receipt scanning and automated expense categorization.
- Automated **recurring transactions**, monthly financial reports, and budget alert emails using **Inngest background job queues** for reliable asynchronous task processing at scale.
- Boosted performance via **Next.js SSR**, lazy loading, and responsive UI with **Tailwind CSS** and **shadcn/ui**, ensuring fast load times and seamless cross-device experience on Vercel.

RideShare – Ride-Hailing Platform | *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, OSRM*  [GitHub](#) | [Live](#)

- Built a production-grade ride-hailing app with **JWT authentication**, role-based access control for Riders and Captains, and a complete ride lifecycle (booking → matching → in-ride → completed).
- Engineered **real-time ride tracking** and live status synchronization across clients using **Socket.io WebSockets**, supporting multiple concurrent active ride sessions with low-latency updates.
- Integrated **OSRM routing engine** with **MongoDB geospatial indexing** for proximity-based captain discovery, accurate ETA calculation, and dynamic route generation on **OpenStreetMap**.
- Leveraged **Gemini API** for AI-powered location autocomplete; implemented OTP verification, dynamic fare estimation, and modular middleware validation across all backend API endpoints.

Achievements

- Solved **900+ DSA problems** across **LeetCode (800+)**, **GeeksforGeeks (90+)**, and **Codeforces**.
- Achieved **Knight Badge** on **LeetCode** with peak rating of **1891 (Top 4.5% globally)**.
- Ranked **~1270 / 30K+** in **LeetCode Weekly Contest 478** and **~1466 / 31K+** in **LeetCode Weekly Contest 483**.
- Secured **1st Position** in intra-college coding competition organized by **CodeCubes Club**.
- Secured **4th Position** in Hardware Track, **StatusCode Hackathon** – developed a fully functional path-retracing and fire-extinguishing robot.
